CORPORATE OVERVIEW

Dock Blocks™ designs and installs customizable modular floating docking systems that meet a variety of waterfront needs. With a focus on durability, our patented technology ensures robust and reliable docking solutions suitable for governmental applications. Our modular floating docks, constructed from high-density polyethylene, feature a unique connecting system that enhances strength and stability, making them capable of withstanding harsh weather conditions, including hurricanes and freezing temperatures. Additionally, our docks are designed to be environmentally sustainable, requiring minimal maintenance and offering easy installation. Whether for recreational use, emergency response, or waterfront development, Dock Blocks™ provides innovative and dependable solutions tailored to your specific requirements.

PAST PERFORMANCE

Folly Beach, SC Police Dept

Drive-On Boat Lifts

- The Folly Beach PD required a more efficient solution to responding to water-related incidents.
- Dock Blocks™ designed and installed two drive-on boat lifts in the public boat landing, specifically for use by the FBPD.
- The result was a 15-minute reduction in emergency response time as the boats were immediately accessible without the need for trailering.

Joint Base Charleston

Floating Dock - Short Stay Recreation Area

- Short Stay required a floating dock to ensure safe water access.
- Dock Blocks™ designed and installed an 80' x 6.4' floating dock with Lumberock decking and strengthening bars for reinforcement.
- The result was a durable and safe dock, enhancing access to the water at this family-oriented recreation area.
