The Smart Choice in Floating Dock Systems

Dock Blocks® is an innovative modular docking system built to last. The modular design of Dock Blocks allows you to customize the best floating dock system for your specific application.

Dock Blocks are over 50% percent stronger than leading competitive products due to our patented connecting system, engineering innovations, and the durable construction process. Made of high-density polyethylene (HDPE), a thick and durable plastic, Dock Blocks are ready to help you enjoy the water no matter what your pleasure.
Did You Know?

Hydrofluoric acid can dissolve through metal, rock, glass and ceramics but cannot eat through HDPE.

Unique Benefits

Strong due to patented connecting system and strengthening bars.

Durable because of high-density polyethylene (HDPE) material.

Hassle Free design that is easy to assemble and extremely low maintenance.

Modular so you can build any custom configuration you desire.
The Difference

Patented Connecting System
Dock Blocks’ proprietary technology locks only two blocks together, providing up to 220 pounds of support for each block, and reducing pressure on connecting pins. The design pulls the blocks closer together as weight is added thus getting the most support out of the blocks.

Thick HDPE Material
The thicker high-density polyethylene material is nearly twice the thickness of leading competitors thus providing more stability and preventing bowing, bending and breaking.

Dock Blocks Wall Thickness: 3000 cm
Leading Competitor Wall Thickness: 1700 cm
Flexible Configurations
Modular design allows you to build any shape you want

All Weather Durability
The strongest choice for hurricanes or freezing temps
Dock Blocks are Used for a Variety of Applications
Drive-On Boat Lifts

Fast and Easy

Dock Blocks make it easy to get your boat in and out of the water. Lifts can support boats up to 12,000lbs and are customizable to any shape your boat requires. Dock Blocks are ideal for:

- flat bottom boats
- displacement hulls
- round-bottom v-hulls
- tri and tunnel hulls
- pontoon boats
- and many more…

Dock Blocks are flexible to fit perfectly at your home or in a marina boat slip, and you can always add more blocks if you get another boat.
Floating Docks

Assemble Anywhere

The perfect customizable solution for swimming docks, walkways, temporary bridges, and access docks.
Personal Water Crafts (PWCs)

Stand Alone or Extensions

Dock Blocks PWC lifts can be used on their own or as extensions to your current Dock Blocks system.

Commercial Rentals

Works For Your Needs

Dock Blocks are easy to customize, hassle-free to maintain, easy to install, and simple to replace.
Marinas
Generate Revenue
Dock Blocks can convert wasted space on the water into revenue-generating drive-on slips, as well as adding fuel consuming, harbor using customers. Additionally, existing wet slips can be converted into dry objects maximizing sales.

Boat Boost
Lifting Heavier Boats

Our custom control panel and air tanks can be added to lift boats up to 12,000lbs.
Do-It-Yourself Installation

Easy as 1-2-3

1. Lay out the blocks in your desired configuration
2. Pop in the connecting pins
3. Screw in strengthening bars

Watch our installation video and read our full manual at www.dock-blocks.com/assembly

All connecting pieces install from the top, making for easy installation & reconfiguration

Strengthening Bars hold the dock tight and provide extra protection

Versatile mooring
Just Listen to Our Customers

Dock Blocks are easy, clean and convenient. Really a great way to keep my boat out of the water. I would recommend Dock Blocks™ to anyone.” – Fred F

“I am really impressed with the whole thing and your customer service. Will gladly recommend you. I had your main competitor’s product before and tried to get another this time but they were such jerks. So I went shopping. What a difference with you. Thank you!” – Sincerely, Joe K

“Hope this message finds you well and busy. Just wanted to let you know how well the Dock Blocks have worked out. Once I had the bottom cleaned getting on and off of the pad is incredibly easy. I have attached a photo but if you need to come out and take another picture feel free to at any time. I know a couple of my neighbors had spoken to you about purchasing from you and I hope it works out.” – Thanks again, Dub G

“The blocks arrived at the time arranged. I assembled the dock in two halves on my fixed dock, launched and connected the two sections. Took about an hour and a half for the 24 block dock. Once the perimeter braces were tightened, I had a very stable and rigid dock. I’m very pleased.” – Thanks for your help, Harry

“The system is working great for us. We use it as a platform for our kayak and SUP owners. Having the system has been a big plus as our owners no longer need to walk their kayaks and SUP’s down the ramp to launch. Maintenance has been non-existent. Just an awesome system.” – Christopher L, Blue Water Yacht Harbor Harbormaster

“Just wanted to let you know that my dock blocks made it through Arthur without a problem. Arthur was a Cat 2 when it came on shore with the eye passing over our condo and marina. Great product! The Jones Brothers’ slip sure looks nice sitting up on it!” – Jeff J
